

Karman Healthcare Knee Walker

The newest generation knee walker has been designed with comfort, safety, and end user in mind. Its new one piece solid knee pad offers the most support available on the market as well as the newest feature which allows the patient to rotate the pad sideways for relaxation and rest. The most necessary options are of course standard with the knee walker including large 8" wheels all around for use indoor and outdoor, a removable basket, and a quick release steering column for easy folding and storage.

Product Features:

- Steerable unit for easy use and everyday drivability
- Parking brake and slow down allows for safe stopping
- Hub Brake design is the safest in the market
- 8" solid flat free wheels can be used indoors/outdoors
- Ergonomic hand grips help prevent pressure on hands
- Handles collapse for easy carry and storage
- Tool-free handle height adjustment from 31"-40.5"
- Tool-free seat height adjustment from 17"-23.5"
- Pad size: 14" x 6"
- 8" flat-free casters for extra stability
- Overall length: 32"; w/basket 37"
- Overall width: 16.5"
- Weighs only 22.5 lbs. *****
- Weight capacity: 350 lbs.
- Available in Black, White, or Burgundy

Enclosed direct axle contact braking system to stop on a dime and ensure vibrations do not affect your safety and stand the duration of time.

Reinforced woven carbon style ergonomic support for your knee or to sit by rotation for relaxation.

Thickest 9cm S-Shape Frame for reaching ultimate stability and style.

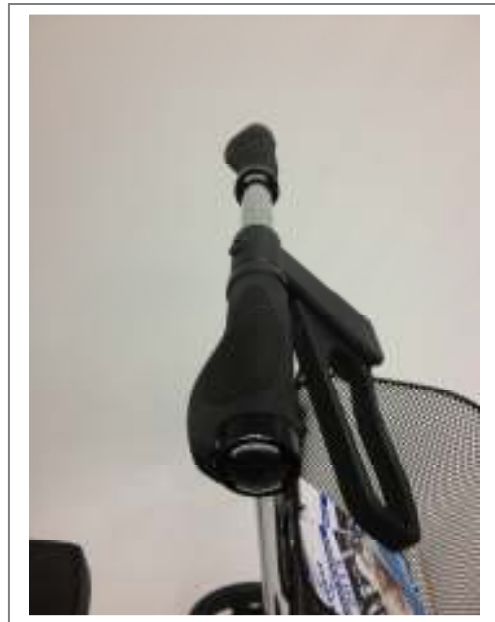

Product Design:

- The most recognizable feature in the knee walker is our new frame design which incorporates a 9cm thick curved frame, a center of frame stability arc which helps incorporate overall safety and true balance compared to the average knee walker on the market today.
- New comfort features added with consumer in mind such as the ergonomic hand grips and easy to release latch basket with plenty of storage space for the mobile end user.

Wire basket with curved shaped to help reduce overall length and incorporate our ergonomic style.

Ergonomic hand grips made out of 65 durometer soft non latex etdm compound promoting steering.
