

The MaxiComfort® patented recline system is one-of-a-kind. No other recline system offers this many options with **smooth, seat-gliding action**, plus a state-of-the-art, easy to use hand control! When comparing MaxiComfort to other three-position lift chairs with an independent or infinite recline mechanism, MaxiComfort's technologically advanced design **significantly reduces shear forces** on the body when reclining.

The hand wand's red and blue buttons are your **action buttons** – blue raises the chair to the standing position and red lowers the chair to the seated position and back to recline. The other four buttons allow you to customize your experience by moving the backrest and footrest independently in the smallest increments to find the perfect position for you. It's that simple!

MaxiComfort with AutoDrive™! The Relaxer models and the Windsor come standard with our new and exclusive AutoDrive hand control system. This technologically advanced system offers pre-programmed positions to give you an even more comfortable, customized recline experience! Find another favorite position? No problem! AutoDrive comes with two programmable memory buttons to be sure your favorite positions won't be lost!

Three styles to match any decor!

The Golden MaxiComfort® advanced recline system is available in three different styles. The Relaxer PR756, available in medium and large sizes, features a four-pillow waterfall back which makes you feel like you're resting on a cloud. The adjustable lumbar support and plush, rounded armrests provide the right amount of support to the lower back and arms.

Because the right fit is so important, the MaxiComforter PR505 series features a classic, seam back style in four different sizes for the perfect fit: junior petite for individuals 5'0" and under; small for individuals 5' to 5'3"; medium for individuals 5'4" to 5'10"; and large for individuals 5'11" to 6'2".

The newest MaxiComfort model is the contemporary Windsor PR506, featuring a plush, two pillow back and overstuffed, flared armrests with a casual comfort feel. The Windsor is a medium frame chair designed to fit people 5'4" to 5'10".

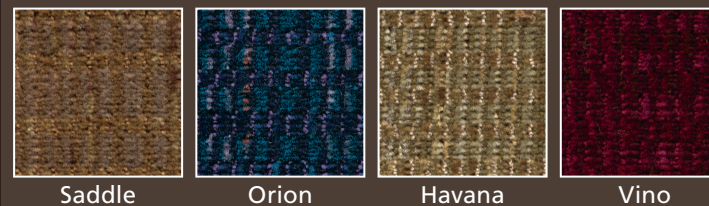

The Golden MaxiComfort line also offers a variety of luxurious fabrics to match any décor, including SofTouch with Stain Defense fabrics. Or choose our exclusive, lavish, breathable Ultraleather™ Brisa® fabric for the ultimate lift chair comfort experience!

You can have it all with a MaxiComfort lift and recline chair, exclusively by the world's leading lift chair experts at Golden Technologies!!

Golden Technologies has perfected comfort. With the development of our exclusive, patented MaxiComfort® positioning technology, Golden delivers the most advanced lift and recline chair available anywhere in the world!

When you slip into a MaxiComfort® chair, your body is transported into a blissful, relaxed state. These chairs offer optimal comfort positions that promote health, wellness, and relaxation for both your body and your mind. Have a seat and discover for yourself why MaxiComfort lift and recline chairs are the world's most comfortable.

The MaxiComfort system transfers you effortlessly and smoothly through multiple lift and recline positions. The most common are the TV watching, sleep, zero gravity and Trendelenburg positions. MaxiComfort is the ONLY seating system that gives you this many recline features and lifts you to the standing position, all at the touch of a button.

Relax & Watch TV

in comfort

In the TV watching position, the seat glides while the footrest raises your feet, keeping the back of the chair angled at 90°. This design reduces friction and discomfort, and creates a soothing angle to cradle your body in comfort as you enjoy many of your favorite activities. You can **read, watch TV, or use your laptop computer** with ease! MaxiComfort provides ergonomic upper body positioning in an effort to minimize neck and shoulder strain.

Relieve Stress

with the pressure-free luxury of zero-gravity!

MaxiComfort® chairs easily take you to the **pressure-free** comfort of the zero-gravity position. In this physician-recommended posture, the spine, hip, and knee joints are on the balanced midpoint of the muscles. With the MaxiComfort power recline system, the seat moves up and down to pivot your hips into this physically beneficial zero-gravity position. This results in natural relaxation and minimum muscle tension. Spinal pressure and muscle tension are relieved, circulation is improved, and feelings of fatigue melt away.

Health Benefits of the Trendelenburg position

The Trendelenburg position is great for the ultimate stretch of your entire back as well as improving circulation. Created by German physician Friederich Trendelenburg, this position raises the feet above the head, increasing blood flow in your lower extremities. Many doctors prescribe the therapeutic benefits of the Trendelenburg position for congestive heart failure, edema or other circulatory conditions where patients need to raise their legs above their heart for certain periods of time each day. The Trendelenburg position assists you in stretching the lumbar area of your back while improving circulation throughout the entire body. Consult with your physician regarding using the Trendelenburg position.
